

DUCAN WATER BASED SATIN SEALER

Ducan Concrete Driveway and Patio Sealer is a clear satin finish that provides an oil, water and stain resistant barrier for use on new or aged surfaces.

It contains a blend of water and acrylic resins that penetrate deep into porous materials. The special blend strengthens the top layer, yet provides a barrier that is allowed to breathe, thus reducing spalling (from freeze/thaw) and efflorescence. Ducan Concrete Driveway and Patio Sealer will be working long after the beading is gone, repelling and reducing oil, gas, antifreeze, de-ice salts, caustic and acidic chemicals, BBQ sauce, etc. from staining due to day to day use. This will allow for easier clean up of stains, preventing premature aging and retaining that new look longer.

Will not harm asphalt, synthetic fibre, plastic or natural rubber.

SPECIFICATIONS

VOC:	100 grams per litre (0.83 lbs per gallon)
Odour:	Mild ammonia odour
Solids:	12.5%
Packaged:	1 US Gal (3.78L), 3 US Gal (11.3L), 5 US Gal (18.9L), 55 US Gal (205 L drum)
Weight:	9 lb per 1 US Gal (3.78 L)
Composition:	Acrylic water blend
Characteristics:	Repellent, penetrant
Consistency:	Thin milky blue liquid (dries clear)
Protection:	yes (penetrant) for best protection apply 2 coats
Thinning:	Water
Interior or Exterior:	Both
Application method:	Roller, brush, or suitable for spray equipment
Application Rate:	125 to 250 sq ft per 1 gallon depending on surface 375 to 625 sq ft per 3 gallon depending on surface
	Application rates are dependant on the porosity of the surface the sealer is being applied to.
Dry Touch Time:	2 hrs. @ 21°C (70°F)
Cure Time:	48 hrs. before traffic is permitted
Clean up:	Use water to clean equipment
Storage & Handling:	Keep containers tightly closed between uses. Keep from freezing.
Shelf life:	1 year in original container
