

# DUCAN WATER BASED WET LOOK GLAZE

Ducan Concrete Driveway and Patio Glaze is a special blend of acrylic resins and water that is a clear surface hardener and repellent that exhibits a hi- gloss, primarily for exposed aggregate concretes, concrete patios, blocks and stucco.

Ducan Concrete Driveway and Patio Glaze repels and resists staining from oil, gas, antifreeze, transmission fluid, etc. It resists chemical attack from de-ice salts, caustic and acidic chemicals. This will allow for easier clean up of stains, preventing premature aging and retaining that new look longer.

**Will not harm asphalt, synthetic fibre, plastic or natural rubber.**

## SPECIFICATIONS

VOC:	100 grams per litre (0.83 lbs per gallon)
Odour:	Mild ammonia odour
Solids:	25%
Packaged:	1 US Gal (3.78L), 3 US Gal (11.3L), 5 US Gal (18.9L), 55 US Gal (205 L drum)
Weight:	9 lb per 1 US Gal (3.78 L)
Composition:	Acrylic water blend
Characteristics:	High gloss clear protector
Consistency:	Thin milky blue liquid (dries clear)
Protection:	yes (repellent) for best protection apply 2 coats
Thinning:	Water
Interior or Exterior:	Both
Application method:	Roller, brush, or suitable for spray equipment
Application Rate:	120 to 200 sq ft per 1 gallon depending on surface 350 to 500 sq ft per 3 gallon depending on surface
	Application rates are dependant on the porosity of the surface the sealer is being applied to.
Cure Time:	48 hrs. before traffic is permitted
Clean up:	Use water to clean equipment
Storage & Handling:	Keep containers tightly closed between uses.
